CHEETAH SIGHTINGS AND/OR SPOOR REPORT

Name:_______Farm Name:_______Farm#:_____

Date (estimate to month or season ie: wet/ or dry	Where sighted? Waterpoint (WH) Roadway (R) Playtree (PT) Savannah (S) Med Bush (MB) Thick Bush (TB)	Number of Cheetah Sighted	Number of Spoor (fresh or older)	List Number, Sex and Age Adult (A) Juvenile (J) Cubs (C) (small or med) Male (M) Female (F)	Comments

Thank you for your continued participation in our research and conservation efforts. We greatly appreciate your record keeping and Comments, as we are continually trying to obtain more accurate information on cheetah distribution, sex and age classes. Your input is very valuable. Please remember that we are always happy to help you with your cheetah questions, problems or concerns. Please call CCF is you trap or kill a cheetah, as we would like to collect samples for our research. Also, we are trying to collect cheetah feaces, so If you have a play tree and could periodically drive by and collect some it can be put in a plastic bag and sealed to dry or can be frozen. If you kill a cheetah, internal body parts can also be frozen prior to our collection.

We have been asked by several farmers to change this reporting paper to make it easier to record. If you have any ideas as to what would make reporting easier, please let us know!!!! Your information is so important, we want to make it as simple as possible while gaining information. We need your feed back. THANKS
